Use this section to comment on specific topics. "1) I really liked the variety of instructors teaching the class. 2) There wasn't enough practice. Some of the people were rude/bossy, and we were rushed. I was way more impressed with the PALS class. 3) The class focused a lot on BLS info. I am not sure if ITLS is BLS and ALS, especially on day one. 4) There was discrepancies with fluid bolus. 5) Another well done class. 6) I liked it all. Very informative."

What would have improved the program? "1) More time and someone on one testing. 2) Maybe more time added to the stations for questions. 3) More hands on BLS skills. 4) More coordination between instructors. 5) If the medic class had prepared us for the class it would have been more helpful. 6) Keep up the good work."

Please add any additional comments "1) I think that the terms ITLS uses are very different than local protocols. We had never heard of some of the changes. It would be nice to compare old and new protocols and at the same time, give us terminology for the national registry. 2) I really enjoy when Wizard comes. All the instructors are very knowledgeable and very good at helping understand topics. 3) Great program. Very well put together and great instructors. 4) Tracy is a riot, Fred is hilarious, Brian is ridiculously smart, Carl looks like Jimbo's dad from American Pie, Lucky likes to get it done, Paul is a ball buster. Good job to all. Thanks Buzz."

Your overall assessment of the course _____
