Use this section to comment on specific topics.

"1) Pt assessment better explained for rapid vs. secondary. 2) All the material on day 1 and 2 was crammed in and covered a little too quickly. 3) Well done. Answered questions and kept my attention. 4) This will help us improve our assessment techniques and allow us to properly treat our patients."

What would have improved the program "1) Access to manual earlier. 2) More time on assessment."

Please add any additional comments "1) Great job on scenarios, looked awesome and more real feel to it. 2) The scenarios were very helpful in putting the info to use. 3) Glad we were enrolled, glad our teammates will be taking the class. 4) I thought the course was great. My only recommendation is to go over DCAPBLS, TIC, CMS in detail in the beginning because of those of us that have never had trauma experience/ classes have never heard of that. Other than that, I really enjoyed. The instructors were superb and it was great to have real mannequins. 5) Awesome use of real patients."

Net Promoter Score: 9 / 9
