Evaluation Station 4	4	1			
Evaluation Station 5	4	1			
Evaluation Station 6		1			

On a scale of 0 (least likely) to 10 (most likely)

.Net Promoter Score: 5/5

What would have improved the program? "1) Balance student questions against course agenda time. 2) Longer time. 3) Add a third ay for testing only. 4) Maybe some continuing education trauma studies/treatment/intervention from the military in future editions of the course. What potentially could change based on research."

Please add any additional comments "1) Consider additional time for digesting data. Excellent course, lots of information to process. Thanks. 2) Great job. 3) Instruction was very organized and very obvious that he had a mastery of the information as well as the ability to teach the material in a fun and informative means."
